

# Digiwallet extension for Magento 2.x

## Usage

Use this plugin to add support for iDEAL, Bancontact, Sofort and other payment methods of Digiwallet.com and Digiwallet.nl to your magento webstore. (Multistore supported)

## Supported Paymethods

IDEAL	✓
Bancontact	✓
Creditcard	✓
Paysafecard	✓
Sofort	✓
Paypal	✓
Afterpay	✓
Bankwire	✓
Refund Creation	✓
Refund deletion	✓

## Installation

### 1. Set up a Digiwallet account

Before you can use the plugin, please sign up for a Digiwallet account on [digiwallet.nl](https://digiwallet.nl)

Note that the plugin can be used in a live environment only after it has been completed with your details and is approved by their compliance department. This would normally take about one working day.

### 2. Download or clone this repository

We recommend cloning the repository so you can easily get updates.

NOTE: If you installed the old Targetpay plugin before, please make sure to remove this first before proceeding with this new plugin, since the old plugin is not backwards compatible with the previous version.

### 3. Setting up the extension in Magento 2.x

How to setup:

1. Extract the attachment zip and upload it into the app directory

The path will be: app/code/Digiwallet/Ideal or app/code/Digiwallet/Sofort, ...

## **2. Install new module using the following commands:**

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:di:compile
```

## **3. Clean cache**

```
php bin/magento cache:flush
```

## **4. Enable payment methods in Magento admin panel**

Go to Stores > Configuration > Sales > Payment methods

The Newly installed methods will be there

Enable them and fill in you "Digiwallet Outlet Identifier"

For every website in digiwallet you get a new identifier

## **Troubleshooting**

Please see the FAQ on <https://www.e-plugins.nl/faq>
